Derek Rush

phone. (949) 280-8977

PROFILE

I am a highly motivated web application developer, and designer with 9+ years of GUI experience and 7+ years working with Ruby on Rails and really intensive javascript. Proven leadership and work ethic. Experienced in a fast-paced startup environment that facilitated the development of valuable skills such as flexibility/adaptability in leadership role and a strong self-start attitude.

EXPERIENCE

WR STUDIOS

2011 - 2016 - Senior Software Engineer

Over the span of several years I assisted in maintaining and launching 4 SAAS/Rails projects on a small agile team for the real estate industry. Most recently I built a front-end framework, to search MLS's through a natural language search feature. Using complex REGEX patterns we autocomplete to match records and display results as the user types. We achieve this by leveraging the performance of JS's non-blocking asynchronous nature for performance.

MIIO

2008-2009 - Programmer

Built social web application similar to Facebook - mostly in Javascript.

FOLDERA

2000 - 2007 - UX Designer, Front End Manager

SKILLS

Ruby/Rails

Node.js/Express/Gulp

Coffeescript/HAML/Jade/SCSS

Photoshop (Adobe Creative Suite)

MySql/Postgres/MongoDB
